Dear Commissioners:

Distribution Center

I am very concerned about the proposal to allow BPL/PLC in the United States. Since power lines are made for 60 hertz use, allowing BPL/PLC would likely just make those former power lines into a very long antenna that will likely radiate those high frequency waves right into Amateur Radio receivers rendering them useless.

Please make sure all tests evaluating this technology are thorough and accurate. A valuable National Resource, Amateur Radio, which is used both in emergencies and in the development of technology is in danger. Please protect it.

Sincerely,

A handwritten signature in cursive script, appearing to read "Beverly A. Carlson".
